

L'équation de **la distributivité** :

$$a \times (b + c) = a \times b + a \times c$$

Exemples :

$$23 \times (20 + 1) = 23 \times 20 + 1 \times 20 = 460 + 20 = 280$$

$$32 \times 101 = 32 \times (100 + 1) = 3\,200 + 32 = 3\,232$$

$$\begin{aligned} 30 \times 9 &= 30 \times (10 - 1) \\ &= 30 \times 10 - 30 \times 1 \\ &= 300 - 30 = 270 \end{aligned}$$

$$\begin{aligned} 13 \times 103 &= 13 \times (100 + 3) \\ &= 13 \times 100 + 13 \times 3 \\ &= 1300 + 39 = 1339 \end{aligned}$$

Exemples (sens inverse) :

$$45 \times 3 + 45 \times 7 = 45 \times (3 + 7) = 45 \times 10 = 450$$

$$867 \times 373 + 867 \times 627 = 867 \times 1\,000 = 867\,000$$

$$47 \times 13 - 47 \times 3 = 47 \times (13 - 3) = 47 \times 10 = 470$$
